9. Radio Communications

Will be conducted as per NSWGFA Guidelines for Radio Schedules for Tournaments. Radio schedules will be kept by all teams with the appointed radio base every second hour commencing at 09:40. Teams may only compete aboard vessels fitted with a working VHF radio that both receives and transmits on VHF Channel 82 and 22.

It is each skipper's decision whether to log on with Marine Rescue Sydney when they leave port prior to the first sched at 09:40.

When called, teams are to report to the radio base as follows:

- (a) Team number, team name, current position (referenced to a grid sheet or central zone map to be provided at the competitor briefing) and whether trolling, moored or drifting and the number of persons on board (only in the case of the first radio sched each day of competition).
- (b) Fishing Reports using the "0-0-0" system (strikes, hook-ups and captures/tag and release), angler's name and the line class used to achieve the capture or tag.
- (c) PHGFC insists that all boats call in and notify of all hook-ups of sharks and marlin and tag/captures of sharks and marlin at time of the event on channel 82 or 22 nominating the vessel name angler and line class.
- (d) All fish to be weighed must be measured for the short length at time of capture. Billfish are to be measured from the lower jaw to the fork in the tail (short measurement). Sharks and other gamefish are to be measured from the nose to the fork in the tail (short measurement). The length in centimetres must be reported at the time of capture to the tournament radio base.

Note that it is incumbent upon any team unable to maintain radio contact with the radio base on one of the VHF channels to ensure that they maintain regular communication with the radio base by way of relayed report from another vessel. Failure to report on two consecutive scheds will result in the boat being considered "missing at sea" and search and rescue procedures will be instigated. A boat, which causes a "search and rescue" situation to be instigated without proper cause, will be disqualified and will be penalised as advised by the tournament committee. If a vessel has radio failure and cannot contact the tournament radio base or relay through another vessel, it must return to port and notify the tournament radio base of their actions.

A ten (10) minute period of radio silence is to be observed before the end of fishing on each day of competition to allow for communication of reports of late hook-ups.

All Tag and Release of fish throughout the competition must be accompanied by time and date stamped photographic images. Note also that if the line class is not clearly shown on all documentation, then the line class shall be deemed to be 60kg.
